

McARDLE LABORATORY For CANCER RESEARCH

Winter 2021 McArdle Laboratory Newsletter

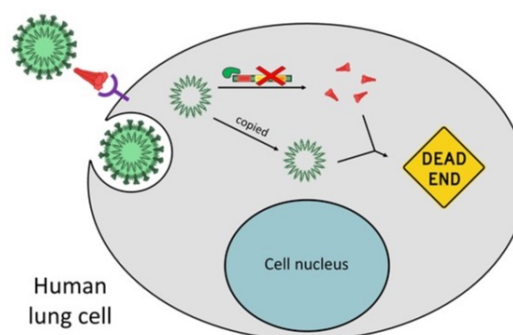

As the COVID-19 pandemic continues to alter our lives, the McArdle Laboratory for Cancer Research is continuing in its mission to understand and fight cancer while educating the next generation of cancer researchers.

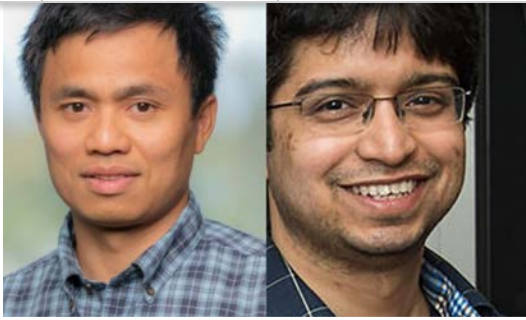

Rising to the challenge

When the COVID-19 pandemic hit, the Sugden laboratory shifted their research to help tackle the challenge by engineering a safer version of the virus that is able to be studied by more laboratories under less restrictive conditions.

The McArdle Laboratory is pleased to announce the hire of two new outstanding faculty members. [Dr. Huy Dinh](#) is using cutting-edge computational tools to study the immune response to cancer. [Dr. Kinjal Majumder](#) is studying how DNA viruses, including tumor viruses, establish replication centers within the nucleus.

A generous gift

Capitol Bank made a generous donation to the McArdle Laboratory thanks to the suggestion of Julie Martinson, a longtime Capitol Bank employee and the wife of McArdle Administrative Officer Randy Martinson.

In Memoriam

The McArdle Laboratory celebrates the amazing life of Dr. Wacław Szybalski, who survived the Nazi and Soviet occupation of Poland, made key contributions to our understanding of genetics and molecular biology, had a private audience with the pope, and served as a professor at McArdle for over 50 years.
